

OACETT 2007 Salary Survey

Order Form

Earn more with certification

Responses gathered from more than 3,000 members across a variety of industries and disciplines for OACETT's 2007 Compensation Survey shows a college technician or technologist diploma leads to a mean salary of \$64,270, well above the average income for Ontario of \$28,900.

And certification correlates strongly with higher levels of compensation. Compared to associate members, certified technologists and technicians earn on average \$10,000 more in annual salary a 17% premium which has a present value over a 30-year career of \$172,000.

"The data clearly show the investment in study time and application fees can pay off handsomely for certified members," said David Tsang, A.Sc.T. President of OACETT. "It's like a permanent raise of \$10,000 a year."

The 2007 Member and Employer Salary Surveys are now available to non-members at \$350 each or \$500 for both.

Please select (✓) the survey(s) you wish to order:

Employer Survey (\$350) Member Survey (\$350) Employer/Member Bundle (\$500)
