The Ontario Association of Certified Engineering Technicians and Technologists

Designation Information

◆ Certified Technician (C.Tech.)

When you successfully complete the Professional Practice Exam (PPE) and any courses (if listed) for C.Tech. and the Admissions Committee confirms you have completed the requirement for appropriate technician level experience, you will be registered with the Certified Technician (C.Tech.) designation.

You need to be registered with the Certified Technician (C.Tech.) designation by January 01, 2022.

Professional Practice Exam (PPE)

Professional Practice Exam

Mandatory

Date of Exam: If you registered to write the exam through Captus Press, your result will appear here once you have written the exam. You must write the exam within six months of the PPE registration.

PPE Application (<https://secure.captus.com/Oacett/new/Register.aspx>)

Experience

The Admissions Committee has determined that you require one year of work experience to demonstrate a facility with the working language and a facility with the standards, codes and practices of the discipline in which you are seeking certification. Normally this is gained by working in Canada for one year.

Once you have attained the above experience, please submit a detailed job description signed by your supervisor plus the names and email addresses of two professional references for an experience review.

Date Experience Last Updated:
